

Hafler®

HA15

Order#: H400-0015

"Hafler amps have been in my studios going on 20 years now. The lows are warm and the highs are smooth. The Hafler HA15 headphone amplifier delivers the same Hafler qualities that I have grown to trust."

Glen Ballard

Producer / Engineer

Katy Perry, Goo Goo Dolls, Van Halen, Christina Aguilera, Shakira, Dave Matthews, Aerosmith, Michael Jackson

HA15 | Solid State Headphone Amplifier

- High performance solid state headphone amplifier
- Variable focus control to simulate listening in a room
- Choice of balanced and unbalanced inputs
- Feed-thru output expands system connectivity options

The Hafler HA15™ is a solid state headphone amplifier that has been meticulously designed to produce Hafler's legendary sound quality with plenty of gain to power any type of headphone.

The design begins with a 14-gauge steel casing to shield the low level signals from external magnetic fields and RF contamination. This is complimented with a black anodized aluminum front panel to add esthetic appeal. Gold-plated input and thru-put RCA connector pairs are employed that will not tarnish over time, thus optimizing signal flow. These are supplemented with balanced XLR inputs when interfacing with pro gear and audio systems. Inside, a low-noise amplification circuit has been optimized to handle all types of headphone impedances from 8 Ω to 400 Ω. To keep noise to a minimum, the HA15 is powered by an external supply.

To replicate the sound and feel of listening to loudspeakers in a typical space, a unique Focus control may be engaged that brings the stereo image to the center. This adds excitement for the listener without losing the stereo field. One merely connects the line output from a receiver, laptop or tablet to the HA15 and it delivers plenty of gain to handle the most demanding dynamic recordings.

Compact and 'plug and play' easy to use, the HA15 follows Hafler's 50 year tradition of building the very finest audio products for the most demanding high fidelity enthusiasts.

Specifications:

Circuit:	Active solid state
Inputs:	RCA and XLR (left/right)
Thru-puts:	RCA (left/right)
Output:	Dual ¼" TRS Headphone
Impedance:	220 Ω
Gain:	20 dB
Size:	4½" (w) x 6" (d) x 1¾" (h)
Power:	15V 400 mA external supply
Warranty:	3 year transferable

Hafler products are proudly designed and manufactured in North America.
